White's Farm Supply, Inc.

Empire Farm Days Add Planter Technology & Tile Plow Seminars Sponsored By White's Farm Supply

Seminars on the agronomic benefits of planting technologies and using a tile plow to install drainage have been added to the daily educational opportunities available at the August 9-11, 2016 Empire Farm Days at Rodman Lott and Son Farms in Seneca Falls, NY.

The advantages of using variable rate seed and fertilizer application, section control, and technologies that ensure proper seed depth and placement at planting to promote optimal corn and soybean development will be presented daily from **10am to 10:30am in the Welcome Center.**

From 10:30am to 11am, the presentation will discuss how tiling impacts water management for crop production and how farmers can use tile plows to install farm drainage tile or corrugated tubing themselves. It is important to do some homework before making a purchase to make sure the equipment will meet grade tolerance for the soil and topography.

White's Farm Supply is sponsoring the presentations with guest speakers from Precision Planting and Crary Tile Pro.

Both seminars are FREE and OPEN TO THE PUBLIC
