Amidst All the New, Find Tried and True Products at 2018 Empire Farm Days

Seneca Falls, NY. Empire Farm Days is known for showcasing the latest in agricultural technology, equipment, and services; however, vendors among the more than 600 exhibitors at the show also bring their tried and true products. Visitors to the August 7-9, 2018 Empire Farm Days event at Rodman Lott and Son Farms in Seneca Falls, NY, will see just how well a proven fertilizer product has worked as Casella Organics showcases its earthlife® 4-3-0 + iron slow release fertilizer at the show. The product will be showcased as part of the 12:30 pm tillage demonstration of working field equipment.

“For more than 20 years, earthlife® fertilizer has been successfully applied on hundreds of farms throughout the northeastern U.S. Those farms include Rodman Lott and Son Farms,” says Casella Organics NY Sales Manager James Lauro.

The anaerobic digestion of biosolids plus a triple pass thermal drying process is used to produce the earthlife® fertilizer that can be easily spread as a non-water soluble, dry granule with a texture similar to conventional fertilizer products. Casella Organics provides larger capacity commercial spreaders to ensure efficient and accurate application rates. The company will have a number of fertilizer, liming agent and soil amendments products for conventional and organic growers on exhibit at booth 229 at the show.

Empire Farm Days is the largest outdoor agricultural trade show in the Northeastern U.S. The event includes agricultural and rural living equipment, working equipment and crops demonstrations, test driving, products, live horse and cattle demonstrations, safety information, and much more with more than 600 exhibitors and vendors. For details on the 2018 Empire Farm Days event, visit the website at www.empirefarmdays.com. Also see Facebook and Instagram.
